## PROFESSIONAL SUMMARY

B.Tech AIML undergraduate specializing in data analysis and BI dashboarding. Proficient in Python, SQL, and Power BI, with proven experience turning messy HR and IT operations data into decision-ready dashboards.

## EDUCATION

### Karnavati University — B.Tech in Artificial Intelligence and Machine Learning

2023 – 2027 | CGPA: 8.03/10

## TECHNICAL SKILLS

**Programming & Data:** Python, SQL, Pandas, NumPy, EDA, Data Cleaning & Visualization

**BI & Tools:** Power BI, Excel (Pivot Tables, VLOOKUP), Power Query, MySQL

**Other:** Git/GitHub, Dashboard Development, Business Reporting

## EXPERIENCE

### Data Analyst Intern — Ratnamani Metals & Tubes Ltd.

May 2026 – Present | Ahmedabad, Gujarat

- Built Power BI dashboards for walk-in recruitment and IT inventory tracking, used for business reporting to HR and IT teams.
- Cleaned and validated recruitment and inventory data via SQL and Power Query; created KPI reports on hiring and stock metrics.

### Data & Software Intern — Adintors Private Limited

May 2025 – Jun 2025 | Ahmedabad, Gujarat

- Delivered 3 production-ready software modules in a 6-week internship; contributed to code reviews and testing.
- Adopted structured Git workflows and flagged data integrity issues that led to team fixes.

## PROJECTS

### Walk-In Recruitment Analysis Dashboard — *Power BI, Excel, Power Query*

- Built an interactive dashboard to analyze walk-in interview data and hiring trends, using Power Query to clean and standardize raw recruitment records.
- Designed KPI cards for Total, Open, Closed, Hold, and To-Be-Joined candidates, with slicers for department-, designation-, and source-wise drill-down.
- Insights supported HR decision-making on where to focus sourcing effort and how to reduce time-to-close on open roles.

### IT Inventory & Asset Analysis Dashboard — *Power BI, SQL, Excel, Power Query*

- Built a dashboard to track IT asset utilization and stock availability, using SQL for data extraction and Power Query for cleaning and transformation.
- Created KPI cards for Total Assets, Available Stock, Low Stock Items, and Inventory Status, with category- and asset-wise breakdowns.
- Enabled dynamic filtering so IT could quickly flag low-stock categories and plan replenishment.

### HR Attrition Prediction & Analytics — *Python, Scikit-Learn, Power BI*

- Built attrition prediction models (Logistic Regression, Random Forest) on 7,000+ employee records, engineering 8 business-relevant features.
- Achieved 86% accuracy and 0.89 AUC-ROC through feature selection and model tuning.
- Visualized attrition trends, feature importance, and employee risk segments in Power BI to inform retention strategy.
